HankisonTM

Meet your rental partner for
compressed air dryers

Gain new levels of operational flexibility

Your Reliable Rental Partner

Hankison's our goal is to provide the largest fleet of Pre-Packaged Compressed Air Treatment Systems, designed and constructed to make transportation, installation and operation quick, safe and reliable. Our highly efficient compressed air dryers are available for immediate shipment throughout Europe and North America **wherever and whenever you need them!** Depend on Hankison Rental the next time you need clean, dry air for supplemental or temporary emergency service requirements.

Our offer - your success

CONTRACT RENTAL

- Rental of air treatment equipment
- Shipments throughout EU and US
- Competitive rates
- Consignment rental

REFURBISHMENTS & SPARE PARTS

- Repair and Refurbish
 - Used Hankison equipment
 - Third party brands
- Original OEM parts

CAPITAL EQUIPMENT

- New-built equipment
- Sell used equipment

Your benefits:

**24/7
Service Support**

**Product and
Service Training**

**Easy to
Operate**

**Large Fleet
availability**

Applications

Uptime. It's the cornerstone of every manufacturer. And ensuring maximum uptime means being prepared for everything from scheduled maintenance to unexpected equipment failure. This is as true for air compression systems as any other system that keeps a company moving forward. A few of the reasons to rent a Hankison air dryer include:

- **Planned Outages and Maintenance** - Maintain continuous operation during plant upgrades or maintenance.
- **Equipment Failure** - Maintain compressed air system's uptime..
- **Temporarily Increased Demand** - Fills temporary need to meet additional demand beyond planned capacity.
- **Testing** - Short-term needs to test a new product or product line.
- **Capital Expenditure Limitations** - Mitigate CAPEX challenges by providing solutions for unprecedented downtime when cash flow is limited.
- **Re-renting**
 - Additional to existing fleet, when you don't have enough equipment
 - As extension of existing fleet, when you don't have the right equipment
 - As emergency solution, to replace your equipment

Recommended Solutions

*Oil -free dedicated equipment is also available from our rental Portfolio, for Class 0 oil-free air

HHL-S EU, Heatless Desiccant Dryers

Utilizing twin towers filled with premium grade activated alumina, Hankison Heatless rental dryers are designed for reliable performance in the most demanding conditions. The standard integrated dewpoint sensor ensures the dry air to the process, while at the same time saving energy. With 3 rental sizes available and more on their way, there is always a perfect fit for your application.

Features

- Pressure dewpoint from -20°C down to -70°C
- Working pressures from 5 up to 10 bar(g)
- Remote control and alarm functions
- 230V or 24V power supply
- Mounted Filtration:
 - Standard outlet filter
 - Oil < 0,08 Ppm/w (liquid and aerosols)
 - Dust < 1 Micron
- Optional high efficiency outlet dust and oil vapor filter
- Control and read-out

MODELS	Capacity*	Dimensions LxWxH	Weight	Connection size
HHL-S 1051	1.000 m³/h (16,7m³/min)	2300 x 1600 x 2000 mm	2.500 kg	DN-80
HHL-S 1651	1.600 m³/h (26,7m³/min)	2300 x 1600 x 2000 mm	2.800 kg	DN-80
HHL-S 2701	2.700 m³/h (45m³/min)	2300 x 1800 x 2200 mm	3.425 kg	DN-100

*@35°C air inlet, -40°C Pressure dewpoint, 7bar(g)

Aftermarket Solutions

Proper maintenance of your compressed air-drying equipment can prevent high costs and lost time due to down time of your installation. Regular maintenance is required not only to minimize the risk of compressed air system breakdowns, but to extend the lifetime of your machines.

Yearly maintenance improves dryers' and compressors efficiency and helps to identify issues in advance that may cause the compressor or dryer to consume more energy than necessary.

For all our dryers, we have genuine Hankison spare parts and Maintenance Kits are available on stock. The kits are meeting the required frequency for maintenance, 1-year, or 5-years. For our desiccant dryers we can deliver molecular sieve and activated alumina in different sizes from stock, like our Premium HQ-A4, which is our 4mm premium quality activated alumina.

Refrigerant Dryers

- 1 year service kits
- Main components

Desiccant Dryers

- 1 year service kits
- 5 year service kits
- Main components
- Desiccant test kit
